

Problem Statement:

** Although tons of information is available through platforms such as GarnetGate and HandShake, there is not one centralized platform that allows students and faculty to view all events whether formal or informal, meet new people, and create new experiences in order to connect in a way they never quite could before.*

Who is experiencing this problem:

** Truly everyone at USC but especially people that may have trouble staying involved in the ways that they desire.*

What is the problem:

** There is a lack of a like "all-in-one" platform at USC that integrates information from all over the place in order to cultivate better student life.*

Why does it matter:

** This issue matters because it hinders students and faculty from fully engaging in the way they could, there's so much more potential.*
